MG ZS
HYBRID+

FOR THE PASSION OF THE DRIVE

For a century, MG has pursued one enduring idea: the joy of driving should never fade. From its British motorsport heritage to modern roads worldwide, MG vehicles are engineered for confident dynamics, balanced performance, and a genuine connection between driver and machine. Today, that legacy evolves through electrification, purposeful innovation, and driver-focused design at the centre of every journey.

BUILT FOR THE LONG RUN

The MG ZS brings together efficiency and responsiveness to make everyday driving effortless. It adapts intelligently to the road ahead, switching between power sources with precision to deliver smooth, consistent performance. Whether in city traffic or longer highway stretches, it uses energy only when needed, and always with purpose. This is driving that feels light on effort, but strong on endurance.

ENDURANCE, ENGINEERED

The MG ZS delivers a controlled and comfortable drive that doesn't spike, but sustains. Its hybrid system manages power efficiently, while a carefully tuned suspension setup reduces vibration and improves ride quality. Optimised chassis components help absorb road imperfections and minimise cabin noise for a smoother driving experience across varied road surfaces. This is a drive that prioritises stability and efficiency in equal measure, shaped by British Driving Dynamics and placing it as the best hybrid SUV drive in its segment.

4.7 L / 100KM
FUEL EFFICIENCY

8.7 SECONDS

MAXIMUM TORQUE

SMOOTH & COMFORTABLE RIDE-FRONT SUSPENSION

The MG ZS Hybrid+ ride performance is more focused on road impact and comfort improvement.

Based on professional tuning on suspension, steering, and the brake system, the MG ZS Hybrid+ provides a comfortable ride experience for drivers.

ABSORB ROAD IMPACT

By optimising the stiffness of ride bushing, there is significant improvement on impact absorption and NVH for ride comfort.

IMPROVE NVH

By fine tuning suspension and tires to provide a quiet driving experience and eliminate unexpected rattles.

REDUCE SHAKES

By strict kinematic and compliance tests to isolate vibrations and reduce road shakes for a more comfortable ride experience.

HYBRID+

EFFORTLESS HYBRID TECHNOLOGY

At the core of the MG ZS Hybrid+ is an energy management system built to go the distance. A dedicated hybrid engine and 3-speed transmission work in sync to keep performance within its most efficient range, reducing wasted energy while delivering a steady, responsive drive. With multiple propulsion modes, it adapts effortlessly in traffic, cruising, and stepping up when acceleration is needed. The result is consistent, sustained performance with lower fuel consumption, designed to keep you going for longer.

HYBRID+

INTELLIGENT HYBRID+ PROPULSION MODE CONTROL

Unlike conventional hybrids, the MG ZS Hybrid+ is engineered as a seamless transition system between petrol and EV. Equipped with a high-capacity 1.83kWh battery, it offers a drive that is smoother, quieter, and significantly more responsive. This intelligent system effortlessly manages different propulsion modes to ensure you are always using the most efficient energy source — whether you're zipping through city traffic on pure electricity or cruising the highway with a combined punch of petrol and electric power.

MG ZS HYBRID+ PROPULSION MODE

CONVENTIONAL PROPULSION MODE

-  **EV MODE:**
Full electric.
Instant torque & near-silent experience.
-  **PARALLEL MODE:**
Petrol engine + electric
Motor for max performance.
-  **DIRECT DRIVE MODE:**
For highway cruising.
Peak fuel efficiency.
-  **REGEN MODE:**
Maximises range.
Reduces wear on brake pads.

MADE TO MOVE WELL

The MG ZS sits in compact SUV proportions with a strong, agile stance that looks ready to move even when it's still. The front pairs connected Hunter Eye lighting with a structured grille, giving it a focused, forward-set expression. Meanwhile, the side surfacing is shaped to manage airflow and reduce drag, while the rear keeps the lighting locked to the body lines for a clean finish.

DESIGN

FUNCTION-FIRST CABIN

The interior of the MG ZS is laid out like a control zone with clear layers, minimal visual clutter, and functions placed within reach. Key controls sit close enough for quick and intuitive use, while the 3-Spoke Steering Wheel with joystick-style controls keep inputs direct, not complicated. Seats use perforated PVC and layered foam to hold support over long drives, so you can go the distance in comfort.

*AVAILABLE IN LUX VARIANT ONLY

SPACE THAT GOES FURTHER

The MG ZS offers generous space with improved proportions across headroom, legroom and shoulder room, ensuring both rows feel genuinely comfortable and usable for everyday life. At the rear, a 443L boot provides practical everyday loading space, expanding up to 1,457L of ample space with the rear seats folded flat, giving you the flexibility to carry anything from daily essentials to bulkier luggage with ease.

SAFETY & STABILITY FIRST

A full suite of driver assistance systems works continuously in the background to help monitor traffic, lanes, and speed conditions. Meanwhile, the body structure of the MG ZS uses up to 81% high-strength steel, supported by a triple load path design that spreads impact forces instead of concentrating them. Six airbags provide coverage across key occupant zones, making safety within the MG ZS not just a feature, but a constant system.
